

## Recording at Intervals (TIME-LAPSE RECORDING)

This function enables the changes of a scene that occur slowly over a long period to be shown within a short time by taking frames of it at a certain interval.

This is useful for making observations such as the opening of a flower bud.

1 Select video mode.

2 Touch  $\odot$  to display the menu.

3 Select "TIME-LAPSE RECORDING" and touch  $\odot$ .

4 Select a recording interval (1 to 80 seconds) and touch  $\odot$ .

- The greater the number of seconds, the longer the recording interval.

5 Start recording.

- A frame is taken at intervals of the selected period.
- When the recording interval is set to "20SEC INTERVAL" or higher, this unit switches to the power-saving mode between recordings. At the next point to record, the power-saving mode will be turned off and recording will start automatically.
- Press the START/STOP button again to stop recording.

## Indications During Time-Lapse Recording

Display	Description
<b>Speed Indicator</b>	Displays the recording interval that is set.
<b>Video Quality</b>	Displays the icon of the video quality that is set.
<b>Remaining Recording Time</b>	Remaining time left to record with the currently selected video quality.
<b>Recording in Progress</b>	Appears when video recording is in progress. When in the power-saving mode, it blinks.
<b>Record-Standby</b>	Appears when video recording is paused.
<b>Actual Elapsed Time</b>	Displays the actual elapsed time after recording starts.
<b>Recorded Time</b>	Displays the actual recorded time of the video. Recorded time increases in units of frames.

### Time-Lapse Setting

The greater the number of seconds, the longer the recording interval.

Setting	Details
<b>OFF</b>	Deactivates the function.
<b>1SEC INTERVAL</b>	Takes a frame at 1-second intervals. Recorded videos will be played back at 30 times speed.
<b>2SEC INTERVAL</b>	Takes a frame at 2-second intervals. Recorded videos will be played back at 60 times speed.
<b>5SEC INTERVAL</b>	Takes a frame at 5-second intervals. Recorded videos will be played back at 150 times speed.
<b>10SEC INTERVAL</b>	Takes a frame at 10-second intervals. Recorded videos will be played back at 300 times speed.
<b>20SEC INTERVAL</b>	Takes a frame at 20-second intervals. Recorded videos will be played back at 600 times speed.
<b>40SEC INTERVAL</b>	Takes a frame at 40-second intervals. Recorded videos will be played back at 1 200 times speed.
<b>80SEC INTERVAL</b>	Takes a frame at 80-second intervals. Recorded videos will be played back at 2 400 times speed.

#### CAUTION:

- Audio cannot be recorded during time-lapse recording.
- Zooming, simultaneous still image recording, and DIS are not available in time-lapse recording.
- When recording is stopped with the recorded time less than "0:00:00:17", the video will not be saved.

#### NOTE:

- Settings of time-lapse recording are saved even when the power is turned off.  
When the power is turned on, "TIME LAPSE" appears on the screen.
  - Recording stops automatically 99 hours after it is started.
  - Make use of a tripod and AC adapter for time-lapse recordings with long intervals.  
It is also recommended to fix the focus and white balance manually.
-
