

Capturing Still Images During Video Recording

Still images can be captured by pressing the SNAPSHOT button while in the video mode (standby or recording).

- "PHOTO" lights up on the screen when a still image is being captured.

- The still images captured during video recording are saved to the destination set in media settings.

"REC MEDIA FOR IMAGE (GZ-MS230)" (P. 0)

"IMAGE SLOT SELECTION (GZ-MS215)" (P. 0)

NOTE:

- The size of the still images captured in the video mode varies with the "SELECT ASPECT RATIO" setting.

"16:9" : 640×360

"4:3" : 640×480

"SELECT ASPECT RATIO" (P. 0)

- The picture quality varies with the "IMAGE QUALITY" setting.

"Changing Still Image Picture Quality" (P. 0)

- When an effect (black and white/sepia) is applied to the video, the same effect will be applied to the still image.

"EFFECT (GZ-MS230)" (P. 0)
