

Creating Animation Effects (ANIMATION EFFECT)

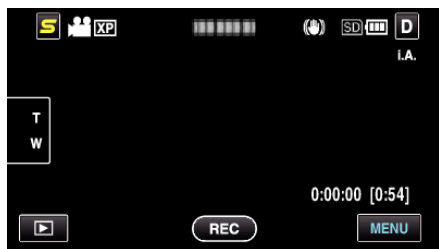

You can add various effects to videos to create a different atmosphere from the usual recording.

1 Open the LCD monitor and select the video mode.

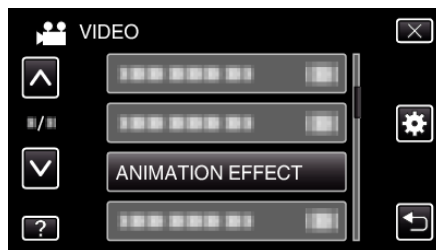

- The video mode icon appears.

2 Tap "MENU".

3 Tap "ANIMATION EFFECT".

- Tap \wedge or \vee to move upward or downward for more selection.
- Tap \times to exit the menu.
- Tap \curvearrowright to return to the previous screen.

4 Select a desired effect and tap "SET".

- Tap $<$ or $>$ to move left or right for more selection.
- Tap \curvearrowright to return to the menu, or tap \times to exit.

During Setting	After Setting	Note
		Animation (effect) appears when smiles are detected.
		Animation (effect) appears when smiles are detected.
