

## Creating Discs with an External Blu-ray Drive

You can copy the recorded files to discs or play back the created discs using an optional external Blu-ray drive.

### Compatible External Blu-ray Drives

You can use BRD-3DU8, BRD-UH8LE, or BRD-UH8S from I-O DATA. (as of December, 2010)

#### Memo :

For the latest information on external Blu-ray drives, refer to the following websites.

- I-O DATA:

<http://www.iodata.jp/everio/>

- JVC:

<http://www.victor.co.jp/dvmain/>

## Creating Discs with an External Blu-ray Drive

### ■ Preparing an External Blu-ray Drive

### ■ Copying to Discs

Select and copy the desired videos or still images individually.

### ■ Other Operations

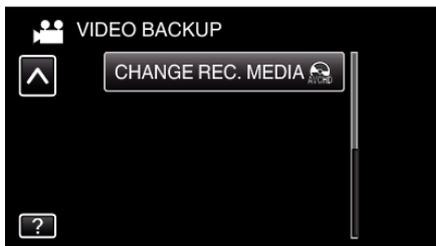

#### Memo :

- The recordable time on the disc varies according to the way of recording.
- When there are many files to back up, it may take time for the backup to be completed. Wait for a while as the access lamp appears blinking, which indicates normal operation.

## Changing the Media of the External Blu-ray Drive

Set the type of media according to the loaded Blu-ray disc or DVD.

- 1 Prepare an external Blu-ray drive.
  - Insert a disc into the external Blu-ray drive.
- 2 Tap "CHANGE REC. MEDIA" in the "BACK-UP" menu.

- 3 Tap "Blu-ray DISC", "DVD(AVCHD)", or "DVD-Video".
  - The media changes to the tapped item. Select the appropriate setting according to the disc.
  - Selecting "Blu-ray DISC" enables you to save videos in a Blu-ray disc in the high definition quality.
  - Selecting "DVD(AVCHD)" enables you to save videos in a DVD in the high definition quality.
  - Selecting "DVD-Video" enables you to save videos in a DVD after converting to the standard image quality.
