

## Playing Back Still Images

You can select and play back the recorded still images from an index screen (thumbnail display).

- 1 Select still image mode.

- 2 Tap to select the playback mode.

- 3 Tap on the file to start playback.

- Still images that are recorded continuously within 2 seconds or with the continuous shooting mode will be grouped together. Only the first recorded file is shown and the group is displayed with a green frame.
- Tap to select the media for playback.
- Tap to return to the index screen.
- Tap to return to the recording mode.

### Operation Buttons for Still Image Playback

#### During Index Screen Display

- Still images that are recorded continuously within 2 seconds or with the continuous shooting mode will be grouped together. Only the first recorded file is shown and the group is displayed with a green frame.

	Rotates to the right (rotates by 90° with each tap)
	Continuous playback of still images captured by continuous shooting

#### Memo :

- Tap or drag on the operation area of the touch screen.
- Operations buttons on the touch screen disappear if the unit is not operated for about 3 seconds. Tap on the screen to display the operation buttons again.
- You can rotate a still image 90° to the right or left during playback. Rotation applies to the on-screen display only.
- You can search for a specific file by the recording date. This is useful when searching from a large number of files.

#### Caution :

- This unit is a microcomputer-controlled device. Electrostatic discharge, external noise and interference (from a TV, a radio, etc.) might prevent it from functioning properly. In such a case, turn off the power, then remove the AC adapter and battery pack. This unit will be reset.
