

Capturing a Required Part in the Video (TRIMMING)

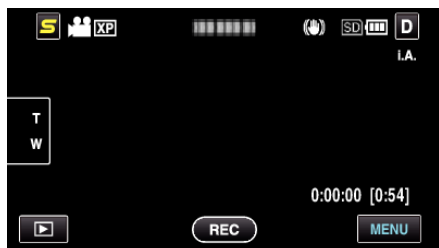

Select the required part of a video and save it as a new video file.

- The original video remains in its existing location.

1 Select video mode.

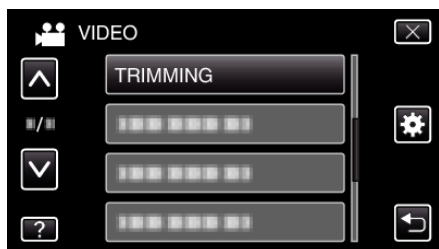

2 Tap to select the playback mode.

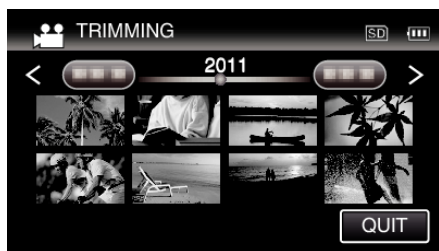

3 Tap "MENU".

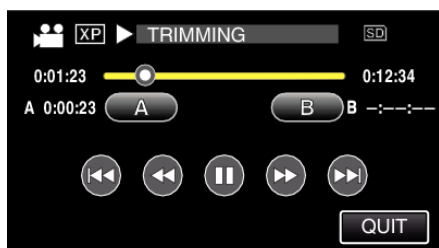

4 Tap "TRIMMING".

5 Tap the video to edit.

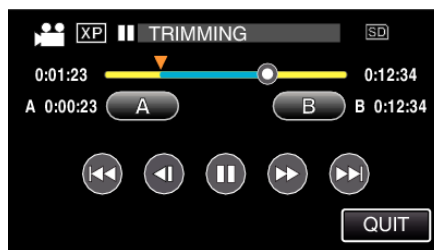

6 Tap to pause playback at the desired start point, then tap "A".

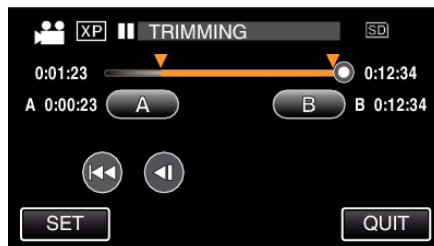

- When "A" is tapped, the start point is set.
- After setting the start point, tap to continue playback.

7 Tap to pause playback at the desired end point, then tap "B".

- When "B" is tapped, the end point is set.
- To reset the start or end point, tap "A" or "B" at the desired scene (position).

8 Tap "SET".

- When "SET" is tapped, the trimming area is confirmed.

9 Tap "YES".

- After copying, tap "OK".
- When copying finishes, the copied file is added to the index screen.

Memo :

- The division point may deviate slightly from the selected scene.
