

Registering a Bluetooth-compliant Device

In order to use a Bluetooth-compliant device with this unit, it is necessary to perform registration (pairing) on this unit.

■ Searching for Bluetooth-compliant Devices to Register

1 Tap "MENU".

2 Tap .

3 Tap "Bluetooth".

4 Tap "REGISTER DEVICE".

5 Tap "SEARCH FOR DEVICE".

6 Select to enable search for the device to register and tap "OK".

- The system starts to search for Bluetooth-compliant devices in the area that can be registered.
- The method of setting varies with the device. Refer also to the instruction manual of the device.

7 Tap the device to register.

- If the device to register cannot be found, check the device settings again and restart search.
- If the device name cannot be acquired, the Bluetooth device address (BD address) will appear instead.
- Characters in the device name that cannot be displayed are shown as □.

8 Tap "YES".

- If authentication of the device is necessary, the passkey entry screen will appear.
- If authentication of the device is not necessary, the passkey entry screen will not appear.

9 Enter the passkey for the device to register.

- Tap on a numeric character to enter it.
- Tap "DELETE" to clear the last numeric character.
- After input of the numeric characters is complete, tap "SET".
- The number of digits in a passkey varies with the device to register.
- A passkey is also known as a "PIN code".
- For details on the passkey, refer to the instruction manual of the device to register.
- After registration of the device is complete, tap "OK".

■ Responding to Registration Requests from Bluetooth-compliant Devices

1 Tap "MENU".

2 Tap "⚙️".

3 Tap "Bluetooth".

4 Tap "REGISTER DEVICE".

5 Tap "WAIT FOR DEVICE".

6 Tap "OK" when "WAIT FOR REQUEST FROM Bluetooth DEVICE ALL CURRENT CONNECTIONS WILL BE DISCONNECTED" is displayed.

- This unit goes into a standby mode to wait for registration requests from Bluetooth-compliant devices. Perform the registration settings on the device to register.

- The method of setting varies with the device. Refer also to the instruction manual of the device.

7 Tap "YES".

- If authentication of the device is necessary, the passkey entry screen will appear.
- If authentication of the device is not necessary, the passkey entry screen will not appear.

8 Enter the passkey for the device to register.

- Tap on a numeric character to enter it.
- Tap "DELETE" to clear the last numeric character.
- After input of the numeric characters is complete, tap "SET".
- The number of digits in a passkey varies with the device to register.
- A passkey is also known as a "PIN code".
- For details on the passkey, refer to the instruction manual of the device to register.
- After registration of the device is complete, tap "OK".

Memo :

- Registration may fail depending on the device you are using. In addition, connection may fail to establish even if the device is registered.
- Results of device search vary according to the selected device, condition of signals, and position of the device.
- The auto power off, power-saving, and demo modes are not available during registration of a Bluetooth device.

Deleting Registered Devices

You can delete a registered device by selecting "DELETE DEVICE" in step 4.
