

## Taking Still Images in Auto Mode

You can record without worrying about the setting details by using the auto mode.

- 1 Open the LCD monitor and select the still image mode.

- The still image mode icon appears.

- 2 Check if the recording mode is Auto.

- If the mode is Manual, touch the **A/M** button. The mode changes between Auto and Manual with every touch.

- 3 Set the focus on the subject.

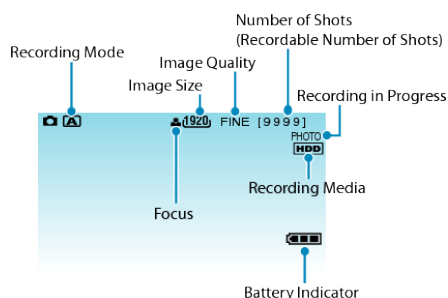

- When focused, the focus icon lights up in green.

- 4 Take a still image.

- PHOTO lights up when a still image is being captured.

**Memo :** \_\_\_\_\_

- The slider operation button cannot be used when the LCD monitor is flipped.
- The zoom appears when the slider is touched.

## Useful Settings for Recording

- When “QUICK RESTART” is set to “ON”, this unit turns on immediately if you open the LCD monitor within 5 minutes after the power is turned off by closing the monitor.
- When “AUTO POWER OFF” is set to “ON”, this unit turns itself off automatically to conserve power when it is not operated for 5 minutes. (only when using the battery pack)
- When “FACE PRIORITY AE/AF” is set to “ON” (default setting), this unit detects faces and automatically adjusts its brightness and focus to record the faces more clearly.
- The image resolution can be changed.

**Caution :** \_\_\_\_\_

- Do not expose the lens to direct sunlight.
- Do not use this unit in the rain, snow, or places with high humidity like the bathroom.
- Do not use this unit in places subject to excessive humidity or dust, as well as places exposed to steam or smoke directly.
- The access lamp lights up when video recording is in progress. Do not remove the battery pack, AC adapter, or microSD card when the lamp is lighted.

**Memo :** \_\_\_\_\_

- Before recording an important scene, it is recommended to conduct a trial recording.
- The digital image stabilizer does not work when recording still images.
