

Bluetooth MIC AUDIO

For specifying the audio recording settings when a Bluetooth-compliant headset is connected.

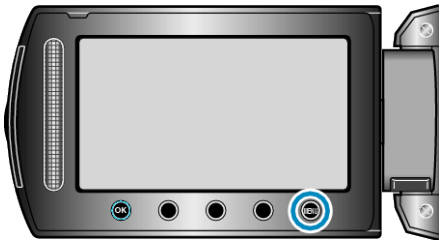

| Setting | Details                                                                                                                              |
|---------|--------------------------------------------------------------------------------------------------------------------------------------|
| OFF     | Records only the audio sound from the built-in microphone of this unit.                                                              |
| ON      | Records mixed audio sounds from both the microphone of the headset connected via Bluetooth and the built-in microphone of this unit. |

CAUTION:

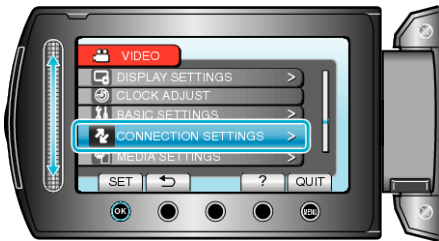

- Echoes may be heard when the microphone of the headset is set to "ON".
