

GAIN UP

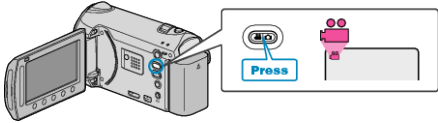

Makes the subject appear bright automatically when recording in dark places.

| Setting | Details                                            |
|---------|----------------------------------------------------|
| OFF     | Deactivates the function.                          |
| AGC     | Electrically brightens the scene when it is dark.  |
| AUTO    | Automatically brightens the scene when it is dark. |

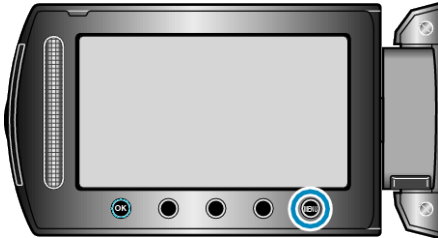

- Memo:**
- Although “AUTO” brightens the scene more than “AGC”, movements of the subject may become unnatural.
  - Setting can be adjusted separately for still images.
