
Capturing Still Images During Video Recording

Still images can be captured by pressing the SNAPSHOT button while in the video mode (standby or recording).

- “PHOTO” lights up on the screen when a still image is being captured.

- The still images captured during video recording are saved to the destination set in “REC MEDIA FOR IMAGE” or “REC STILLs TO SLOTS”.

Memo :

- The size of the still image that is captured in the video mode is 1920 x 1080.
 - Operation is invalid under the following conditions:
 - when menu is being displayed
 - when file information or remaining battery power is being displayed
 - when “FACE SUB-WINDOW” is set
 - when “ANIMATION EFFECT” is set
 - Still images cannot be captured during video recording when cables are connected to the HDMI (with output other than 1080i) or AV connector.
-
