

GAIN UP

Makes the subject appear bright automatically when recording in dark places.

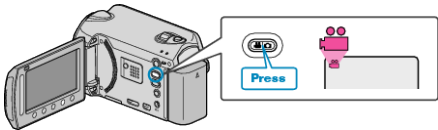

| Setting | Details                                            |
|---------|----------------------------------------------------|
| OFF     | Deactivates the function.                          |
| AGC     | Electrically brightens the scene when it is dark.  |
| AUTO    | Automatically brightens the scene when it is dark. |

Memo :

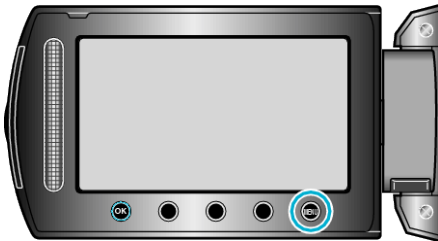

- Although “AUTO” brightens the scene more than “AGC”, movements of the subject may become unnatural.
- Setting can be adjusted separately for still images.

Displaying the Item

- 1 Select video mode.

- 2 Touch to display the menu.

- 3 Select “GAIN UP” and touch .
