

GY-HM890/GY-HM850 INSTRUCTIONS

Notification of Changes

This is a notification of the addition and change in function. Please read this in addition to the “INSTRUCTIONS” of this camera recorder.

* The reference page numbers stated here are for the English version “INSTRUCTIONS”.

Performance Improvement

When SDI is selected in [A/V Set] → [Video Set] → [Return Input], you will be able to select from five methods of displaying the [Return Video].

(P113 [Return Video])

(For GY-HM890 only)

* With this improvement, the following memos will be deleted.

- P113...[Return Video]: Delete memo

Memo : _____

- When [A/V Set] → [Video Set] → [Return Input] is set to “SDI”, this item is fixed at “Camera ⊃ Return”.

- P127...[Return Input]: Delete memo

Memo : _____

- If this item is set to “SDI”, the setting for [Camera Function] → [User Switch Set] → [Return Video] is fixed at “Camera ⊃ Return”.

Adding Missing Information

- P113...[Return Video]: Add “890” and “890CH” marks

Return Video

Return Video **890** **890CH**

Additional Note

- P137...[Clip Set] → “Clip Name Prefix”: Add memo

Memo : _____

- “-” (hyphen) in the [Clip Name Prefix] will be replaced with “_” (underscore) only when recording clips to the DCIM folder.

Adding List of Possible Return Input Signals

- P172... Add

The possible Return input signals are different depending on the system frequency and the resolution setting of the camera’s recording format.

(For GY-HM890 only)

System Frequency	Resolution	Possible Return Input Signal
60/30/24	1920×1080	1080/60i
	1440×1080	480/60i
	1280×720	720/60p 480/60i
	720×480 *1	480/60i
50/25	1920×1080	1080/50i
	1440×1080	576/50i
	1280×720	720/50p 576/50i
	720×576 *2	576/50i

*1 U model only

*2 E model only

GY-HM850 取扱説明書 追加変更のお知らせ

追加・変更された機能についてのお知らせです。本機の「取扱説明書」とあわせてお読みください。

注記事項メモに追加

- P129・・・[クリップ設定] → [クリップ名] のメモ：項目追加
